EXPERIENCE

Java Full Stack Developer

Tata Consultancy Services | Client: Ericsson

June 2023 – Present

Hyderabad, India

- Developed and maintained backend **microservices** using **Java, Spring Boot, Hibernate, MySQL**, automating internal workflows and operational processes.
- Designed and exposed **REST APIs with JWT authentication**, reducing manual intervention by 60% and improving system efficiency.
- Configured **Kafka Streams pipelines** for real-time telemetry and event processing, lowering latency by 30%.
- Optimized backend performance through **efficient data structures, JVM tuning, and thread pool adjustments**, improving throughput by 20% under load.
- Deployed applications on **AWS (EC2, S3, RDS, Elastic Beanstalk, Lambda, API Gateway)** and implemented **CI/CD pipelines with Jenkins and Docker**, ensuring reliable production deployments.
- Implemented **AI-driven enhancements** using **LLM-based chatbots and RAG pipelines**; participated in Agile ceremonies, code reviews, and production incident resolution.

PROJECTS

E2C Internal Collaboration Hub | Java, Spring Boot, Angular, MySQL, AWS, Docker, Jenkins

- Developed a **centralized collaboration platform** automating multi-step workflows, reducing manual operations by 60%.
- Built backend services and secure **REST APIs** using **Spring Data JPA, Hibernate, JWT authentication**.
- Deployed on **AWS** with **CI/CD pipelines in Jenkins and Docker**, ensuring fast and reliable production releases.
- Integrated **AI-driven enhancements** including LLM-based chatbots and RAG pipelines.
- AI features reduced manual workflow intervention by 40% across internal teams.

Distributed Ticket Intelligence System | Java, Spring Boot, Kafka, MySQL, Docker, AWS, RAG Pipelines

- Designed **microservices** for automated ticket classification and prioritization using **Kafka event streams** for real-time processing.
- Implemented efficient backend algorithms and data structures, improving processing speed by 35%.
- Deployed and containerized services on **AWS + Docker**, integrated with Jenkins CI/CD pipelines.
- Leveraged **RAG pipelines and AI insights** to reduce manual intervention by 40%.
- Designed **microservices** to handle 1000+ concurrent requests per second while maintaining <200ms latency

SKILLS

Programming / Backend: Java, Python, SQL, Spring Boot, Hibernate, REST APIs, Kafka, JWT Authentication

Frontend: Angular, React (Basic), HTML5, CSS3, JavaScript

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, Elastic Beanstalk, API Gateway), Jenkins, Docker, Maven, Git

Core Concepts: Microservices, OOPs, SDLC, CI/CD, Agile (Scrum), Data Structures & Algorithms

Additional: Generative AI, LLM Integration, RAG Pipelines

ACHIEVEMENTS

- Awarded **Star of the Year**, multiple **Star of the Quarter/Month**, and recognized among **Top 5% associates** with a **T-Factor score of 4.99+**.
- Participated in internal hackathons and innovation initiatives, delivering automation prototypes and proof-of-concepts.

EDUCATION

Bachelor of Technology

Raghu Institute of Technology, Visakhapatnam

2020-2023

CGPA: 9.3
